Heet Mehta

Computer Engineering Student | Full-Stack & AI/ML Developer

heetmehta18125@gmail.com | +91 9316428942 | GitHub | Portfolio | LinkedIn | LeetCode | CodeChef

SUMMARY

Computer Engineering student of CHARUSAT University specializing in Web Technologies and AI/ML. Built and deployed full-stack and AI-integrated projects. Passionate about Full-Stack Web Development, AI/ML Engineering, Data Science, Open Source Contribution, Competitive Programming, and UI/UX Design. Seeking a Full-Stack Development or AI/ML Engineering internship (May–June 2026) to contribute to real-world products.

EDUCATION

B.Tech – Computer Science and Engineering | CHARUSAT University (CSPIT), Anand | CGPA: 7.44 *2024 – Present*
HSC – Science Stream | GSEB | 567/650 | 95.40 Percentile *2024*
SSC | GSEB | 540/600 | 98.24 Percentile *2022*

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, C, C++, Java, PHP, HTML5, CSS3, Python
- **Frontend:** React 18, Tailwind CSS, Vite
- **Backend:** Node.js, Express.js, REST APIs, WebSocket
- **Database:** PostgreSQL, MongoDB, Redis, Pgbouncer
- **AI / ML:** scikit-learn, TensorFlow, NumPy, Pandas
- **DevOps & Tools:** Git, GitHub, Docker, Nginx, GitHub Actions, Figma, VS Code

PROJECTS

InvoNotify - Smart Invoice Tracking & Notification System *Dec 2025 –Mar 2026*
Typescript, GitHub Actions, CI-CD
- It's a smart invoice management and notification system designed to help users track, manage, and receive timely alerts for invoices, payments, Customer Relations ,and due dates. It streamlines financial tracking by ensuring users never miss important billing deadlines.

Geatherlyy – Club Management Platform *Aug 2025 – Nov 2025*
TypeScript, React, Node.js, WebSocket
- Full-stack university club management platform enabling students and clubs to connect, interact, and collaborate in a centralized space.

Code Arena – Competitive Programming Platform *Mar 2026 – Present*
Node.js, React, TypeScript, PostgreSQL 15, Redis, Bull, Docker, Nginx, PgBouncer
- Co-built (3-person team) a scalable competitive platform with Contest Mode, architected Nginx + 3 Bull/Redis worker queues + PgBouncer handling 50+ concurrent compile jobs, Monaco Editor (C/C++,Python,SQL) with 3s runtime feedback, and 100+ active users.

OPEN SOURCE CONTRIBUTIONS

- Ollama (168k★ repo) | Mar 2026: Opened PR #14992 to remove duplicate TopLogprobs validation in GenerateHandler and ChatHandler, eliminating dead code and reducing confusion in request handling paths.
- Keploy Blog Website | Feb 2026: Opened PR #335 redesigning the testimonial marquee with a dual-row infinite scroll layout, adding security headers (X-Frame-Options, CSP, Referrer-Policy) in next.config.js, and fixing SEO/favicon paths under the /blog basePath.

CERTIFICATIONS

- Foundations of Data Structures and Algorithm Analysis – Packt via Coursera (Mar 2024)
- Java Class Library – LearnQuest via Coursera (Jun–Aug 2025)
- Building Web Applications in PHP – University of Michigan via Coursera (Jul–Sep 2025)
- Analytics with Python – Coursera (Jan–Mar 2026)
- Algorithm Design: Mastering Computational Problem Solving – Coursera (Jan–Mar 2026)

LEADERSHIP & PARTICIPATION

- Coordinator, C Titans Hackathon: Co-organized an inter-college hackathon at CHARUSAT, managing technical issues, problem statements, and participant coordination.
- Coordinator, SUPERNOVA: Organized a competitive coding event for 1st Year students using LeetCode/CodeChef C problems with a Tic-Tac-Toe twist in round 2 to enhance engagement.
