Heet Mehta

Computer Engineering Student | Full-Stack & AI/ML Developer

heetmehta18125@gmail.com | +91 9316428942 | GitHub | Portfolio | LinkedIn | LeetCode | CodeChef

SUMMARY

Computer Engineering student of CHARUSAT University specializing in Web Technologies and AI/ML. Built and deployed full-stack and AI-integrated projects. Passionate about Full-Stack Web Development, AI/ML Engineering, Data Science, Open Source Contribution, Competitive Programming, and UI/UX Design. Seeking a Full-Stack Development or AI/ML Engineering internship (May–June 2026) to contribute to real-world products.

EDUCATION

B.Tech – Computer Science and Engineering | CHARUSAT University (CSPIT), Anand | CGPA: 7.44 *2024 – Present*
HSC – Science Stream | GSEB | 567/650 | 95.40 Percentile *2024*
SSC | GSEB | 540/600 | 98.24 Percentile *2022*

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, C, C++, Java, PHP, HTML5, CSS3, Python
- **Frontend:** React 18, Tailwind CSS, Vite
- **Backend:** Node.js, Express.js, REST APIs, WebSocket
- **Database:** PostgreSQL, MongoDB, Redis, Pgbouncer
- **AI / ML:** scikit-learn, TensorFlow, NumPy, Pandas
- **DevOps & Tools:** Git, GitHub, Docker, Nginx, GitHub Actions, Figma, VS Code

PROJECTS

Coastal Guardian – AI Coastal Monitoring Platform *Mar 2024 – Sep 2024*
React, Node.js, Express.js, MongoDB, Docker, GitHub Actions
- AI-powered coastal threat detection platform integrating NASA satellite imagery and OpenWeatherMap APIs with TensorFlow/scikit-learn (Rasa) ML models; secured with JWT auth and WebSocket for real-time streaming, containerized with Docker, and deployed via GitHub Actions CI/CD.

Geatherlyy – Club Management Platform *Aug 2025 – Nov 2025*
TypeScript, React, Node.js, WebSocket
- Full-stack university club management platform enabling students and clubs to connect, interact, and collaborate in a centralized space.

Code Arena – Competitive Programming Platform *Mar 2026 – Present*
Node.js, React, TypeScript, PostgreSQL 15, Redis, Bull, Docker, Nginx, PgBouncer
- Co-built (3-person team) a scalable competitive platform with Contest Mode, architected Nginx + 3 Bull/Redis worker queues + PgBouncer handling 50+ concurrent compile jobs, Monaco Editor (C/C++,Python,SQL) with 3s runtime feedback, and 100+ active users.

OPEN SOURCE CONTRIBUTIONS

- Ollama (168k★ repo) | Mar 2026: Opened PR #14992 to remove duplicate TopLogprobs validation in GenerateHandler and ChatHandler, eliminating dead code and reducing confusion in request handling paths.
- Keploy Blog Website | Feb 2026: Opened PR #335 redesigning the testimonial marquee with a dual-row infinite scroll layout, adding security headers (X-Frame-Options, CSP, Referrer-Policy) in next.config.js, and fixing SEO/favicon paths under the /blog basePath.

CERTIFICATIONS

- Foundations of Data Structures and Algorithm Analysis – Packt via Coursera (Mar 2024)
- Java Class Library – LearnQuest via Coursera (Jun–Aug 2025)
- Building Web Applications in PHP – University of Michigan via Coursera (Jul–Sep 2025)
- Analytics with Python – Coursera (Jan–Mar 2026)
- Algorithm Design: Mastering Computational Problem Solving – Coursera (Jan–Mar 2026)

LEADERSHIP & PARTICIPATION

- Coordinator, C Titans Hackathon: Co-organized an inter-college hackathon at CHARUSAT, managing technical issues, problem statements, and participant coordination.
- Coordinator, SUPERNOVA: Organized a competitive coding event for 1st Year students using LeetCode/CodeChef C problems with a Tic-Tac-Toe twist in round 2 to enhance engagement.
